

JEC Phils @ AESSEP-Energy Conservation Series Seminar

Last September 25, 2008 JEC Philippines participated at AESSEP (Association of Electronics and Semiconductor for Safety and Environment Protection) seminar series on Lowering Power Cost and Energy Conservation Technologies.

AESSEP is one of the sub organization of SEIPI (Semiconductor & Electronics Industries in the Philippines) in which JEC is a member and actively participate to different activities focusing on semiconductor clients.

Meralco (Manila Electric Company) presented the sample computation on realistic value of power cost if purchase through Retail Electricity Suppliers and its effect to the Semicon Industries in the morning session.

JEC Phils presented the **“Environmental and Energy Efficient Maintenance using Ball Technic Technology”** in the afternoon session. It was a 45 minutes presentation by Fletcher Bulatao, Sales Engineer of JEC and other Sales Engineers followed by an audience positive response by asking more questions giving an hour extension for the open forum.

The whole day affair was participated by more than seventy people from facilities manager and pollution control officers from different top companies like First Gen., Analog Devices, Avanti, Continental Temic, First Sumiden, Hitachi GST, Intel, NXP , Allegro, Maxtronix Inc., and other semicon companies.

JEC’s actively participate to this kind activity to support the **Safety and Environment Protection** program.
