

JEC Philippines @ SEIPI 2008

Last June 4-6, JEC Philippines joined the tradeshow of Semiconductor and Electronics Industry (SEIPI) held at SMX Convention Center, the newest and largest privately-run exhibition and convention center in the country. The exhibit promotes companies and products that generate the Philippines exports.

Attending this event promoted JEC Philippines image within the Semicon industry. Promotions also focused on Product partners like Midea, Multistack, Permafrost, BAG Electronics and Ball Technic.

Attending this event not only boosted JEC image but also built trust and good relationship with existing clients and the Philippine business community.
